Problem

- Managing and growing a Thread account is time consuming
- Active creators, entrepreneurs, and digital marketers spend 1–3 hours daily posting, engaging, and maintaining visibility.
- Without consistent activity, account reach and growth drop quickly.

Lackings in Threads

- Threads lacks built-in scheduling and automation tools, forcing manual work every day.

Thriend

Objectives

Automate Scheduling

Automate post scheduling and publishing on Threads.

Drafts

Provide user a space where they can write and save ideas into drafts and can use later when needed

Provide Detailed Analytics

To grow effectively on Threads, regular analytics tracking is essential. Weekly insights help users understand which posts perform best, when their audience is most active, and what type of content drives engagement. Without this data, consistent growth becomes guesswork rather than strategy.

Help Thriends to Grow

Thriend

Solution

Thriend.io is a web-based automation platform that streamlines activity on Threads. It allows users to schedule and publish posts automatically, generate or refine content using AI, and manage engagement such as likes, replies, and follows. The system also tracks analytics to help users measure performance and optimize their growth strategy.

Schedules and automates thread posting.

Provide space to save ideas as a Drafts

Advanced Analytics

Allow uploading of carousels, images and videos

Help Thriends to Grow without manual work

Step By Step Guide

User will Signup/login first then they will connect their account with threads. After connection users can either make a post, schedule it, publish on the spot, duplicate the scheduled posts or even update the scheduled content.

Users are able to monitor analytics through threads and even save and edit drafts that can be used in the future.

Methiodologies

- Login / Signup
- Connect Threads Account
- Publish, Edit, Duplicate, Delete Schedule Posts
- Monitor Analytics and Save/Edit Drafts

conclusion

- Automated post scheduling and engagement reduces human effort by 80%.
- Ensures consistent posting, improving visibility and follower growth.
- Analytics module tracks engagement trends effectively.
- (Include before/after growth chart for example post analytics)

Thriend

Future Enhancement

- Automatically generate posts by specifying niche and target audience.
- Select generated posts and schedule them with one click.
- Set intervals to post hundreds or thousands of Threads automatically throughout the month.
- AI-powered engagement via browser extension.
- “Reply with AI” button appears on posts for instant AI responses.
- Reply management: Respond to posts individually or in bulk, either automatically via AI or manually.

Thank you
